The vines must not be pulled, as the lice will drop off on other vines and then continue to spread. In order to be able to destroy these at once when they make all needful rules and regula- sembly may, in its discretion, con- appear it is quite necessary to look after all of the field at least twice a

Fighting the Cucumber Beetle. The larva of the cucumber beetle is subterranean in habit. It is a slender, wormlike creature, white with a dark head, and it attacks the roots and bores inside the stems of the plants. Good success in treating it has been obtained by covering the young plants of dirt. Every foint on the stalk will Children's Missionary Society, second Sabwith a square of cheesecloth, kept put out roots, and heat and moisture raised by two flexible sticks crossed at right angles and with the ends stuck The plant will withstand whatever in the ground. The cheesecloth is held down easily by putting some earth on wet, the upper roots will push the Preaching every Sunday at 11 a. m., and the edges. #### BEST VEGETABLES.

List Recommended by Canadian Experimental Farm. In the last report of the Canadian ex- TOWN AND COUNTY. perimental farm a concise list of varieties of vegetables which have proved satisfactory through several years is given. A part of it is as follows:

Asparagus.-Conover's Colossal is the best all round variety, but this variety is more subject to rust than Palmetto or Argenteuil.

Beans.-Golden Wax or Wardwell's Kidney Wax for early crop, Early Refugee for medium and Refugee or One Thousand to One for late crop are the most satisfactory dwarf varieties. As-paragus (early) and Old Homestead are two of the best pole varieties.

Beets.-Egyptian Turnip, Eclipse and Bastian's Blood Turnip are three of the best varieties.

Borecole or Kale .- Dwarf Green Curled Scotch is the best. Broccoll,-White Cape.

Brussels Sprouts.-Improved Dwarf s the most satisfactory. Cabbage. - Early Jersey Wakefield (early), Succession (medium), Late Flat Dutch, Drumhead Savoy (late), Red Dutch (red) is a select list of the best

varieties of cabbage. Cauliflowers.-Extra Early Dwarf Erfurt and Early Snowball (early) and ing he says: I use a two row, pivot planted with advantage. It is a small

TO CURE A COLD IN ONE DAY

# WASH THE BOY OR WASH THE SUIT

As often as you please-it won't hurt either one of them. Sensible mothers are coming more every year to see the wisdom of dressing the boys, during the summer, in commonsense wash clothing, and permitting them to play in the dirt, if they want to. It's good for the boy's health, and it relieves the mother of the strain of constant watching and saying "Don't get in the dirt." It's immensely cheaper, too. Think of dressing the boy in a natty suit for 50c., 75c. or \$1. And that's just what can be done here. Our Wash Suits are made of several styles of wash material that will wash and wash again. All of the styles are handsome and none of them expensive.

Orders Received by Mail or Telephone.
